

Congratulations on your purchase of the Earthlite Bolster Armrest. Earthlite Bolster Armrest adds an extra 10" to the width of any massage table, and it is lightweight and easy to install. Please read and follow the below installation instruction carefully.

---

1. Begin by laying the two armrests across your massage table, making sure the top three straps are not twisted.
2. Evenly adjust each strap so bolsters are positioned at slight upward angle on each side of table (see image 2).
3. Lock lower cinch strap buckle halves together (center strap only) and pull adjustment strap to level and tighten bolsters to table sides (see image 3).
4. Each bolster has two Velcro strips. Peel protective film from pre-fastened Velcro tape folding up and under the table. Press firmly. Press four Velcro tabs to Velcro tape under table edge (see image 4).
5. Your Bolster Armrest is now ready. Check all adjustments prior of each use.
